

1 MILLION USERS MOVED TO WORKSPACE AND COUNTING...

Google Workspace (previously: G Suite) is a complete suite of collaboration, productivity, and communication tools. Accessible from any device, any time. It has all you need to do your best work, together in one package.

We work with cloud natives, SMBs, corporate organisations, and enterprise customers. As Devoteam G Cloud we have moved over 1 million users to Google Workspace, creating a secure digital workplace that nurtures collaboration, boosts productivity, and enables business continuity in any situation.

HOW WE WORK

Change management (40% of the workload)

Moving to Google Workspace is not just a technology change, it is a change in the way teams work. And this requires professional change management processes, to make sure all employees can easily adapt to new ways of working and benefit from the innovative solutions. Our change management methodology is based on ADKAR. We have certified professionals to help make sure that the change sticks.

We make sure your team is fully trained and can use the full potential of the tools they get.

Project management

Our team has multiple senior project managers to make sure that the project gets completed on time, on the budget at a high quality.

Technical execution

Our team of technical experts makes sure that Google Workspace gets integrated into your current IT environment, that all the data of your legacy systems get migrated, and also make sure that you use Google Workspace in the most optimal way possible.

Customer Success Services

The project of going Google doesn't stop at Go-live day. It's a constant process of supporting the users, keeping them engaged, and driving constant innovation through the new solutions. We provide technical support as well as customised trainings focused on specific tools and their effective adoption.

Our customers are the first to know about new features, updates, and Workspace roadmap that is periodically shared by Google.
