

# 100% transparency and control

## Take full control of your cloud projects and costs with the MSP Command Center from Devoteam

With so many possibilities and use cases that the Google Cloud can bring comes the need for a better control to optimize the costs of cloud usage.

We know that effectively managed environment can not only help in decreasing the operational costs, but also accelerate on core projects and increase their ROI.

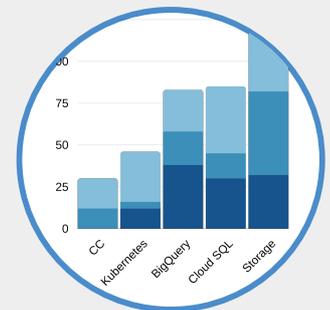

That's why our experts created the MSP Command Center - a place where our customers access a fully transparent and customised image of their cloud usage and cost assignment.

## Billing

Keep track of product usage and billing of specific GCP products.

- Forecasted Cost allows the client to estimate future billing cycles based on current usage and adjust accordingly.
- Adjust the dashboard to show weekly, monthly and customised billing cycles.
- Arrange visuals by product, projects and date range.

## System Health

Explore, analyse and get alerts on your GCP system health metrics through clear real-time visualisations

## Inventory

Filter your GCP Inventory by Asset type and name, and receive clear overviews of Google recommended actions to maintain optimal usage and system health.

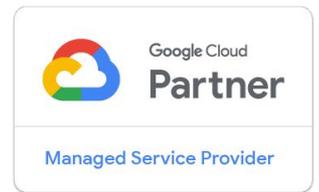

## Support Request

Submit support requests based on Inventory recommendations. View the status and priority level of requests. Clients can rate their satisfaction with responses to support tickets. Assign P1 to P4 priorities, with a 98% SLA compliance.

These features allow the MSP team to have clear insight into customer cases and treat with each case the attention and focus as if it were their own business. The command center provides a platform for the MSP team and clients to take on a predictive approach vs a reactive one. A single pane of communication, control and information permitting the MSP team and client can work in unison.
